

AWG gasoline catalyst converter core

Product codes:

Reference: STANDARD-EL
EAN13: 5904347538132

Product features:

Catalyst application: Gasoline
Cartridge type: Standard

Product attributes:

euro standard: Euro 4, Euro 5, Euro 6
Insert dimensions: 150x100x120, 137x119x110,

Cartridge material: Metal
Producer: AWG Polonez

135x110x140, 135x95x60, 135x110x110,
135x95x80, 135x110x80, 135x110x60
Capacity (cpsi): 500, 600

Product description:

Universal metal catalytic converter cartridge to be welded into the housing (manifold).

Compatible with gasoline engines and LPG systems.

The catalytic converter, depending on the selected configuration, meets the requirements of the European directive:

- **EURO 4 Directive 98/69/EC, 2002/80/EC for all vehicles, in effect since 2005.**
- **EURO 5 Directive 2007/715/EC[13] for light passenger and company cars. In force since 2009.**
- **EURO 6 Commission Regulation (EU) No. 459/2012. In force since 2014.**

Manufacturer's warranty: 12 months or 50,000 km.

The catalytic converter insert is selected on the basis of the emission standard it is supposed to comply with and its dimensions. Unfortunately, no catalogue gives the dimensions of the insert, because theoretically it is a non-replaceable part, so in order to properly select the insert you must measure the diameter and length of the catalytic converter housing. The wall thickness of the catalytic converter housing must then be subtracted, as the insert is located inside the housing. For example, if the catalytic converter housing has a diameter of 120 mm, a cartridge with a diameter of 115 mm would be suitable.
