

Porsche 911 Carrera catalytic converter

Product codes:

Reference: REG-PORSCHE-911

EAN13: -

Product features:**Product attributes:****Product description:**

The subject of the offer is the regeneration of the catalytic converter, which involves welding new metal catalytic converter inserts into the original housings. The dimensions of the cartridge are optimally matched to this car in terms of diameter and length and are 130/100 mm. The emission standard of the cartridge is Euro 5 and the capacity is 400 cpsi. We also have sports cartridges with an increased throughput of 200 cpsi.

The special three-way construction of the metal cartridge guarantees resistance and reliability and the cartridge has all the necessary approvals and a 12-month warranty. The original lambda probe sockets are welded a few centimeters backwards, which allows us to install the cartridge of the correct size and ensures its effectiveness.

We do the regeneration in one day and send you back the catalytic converter ready for installation.

When sending the catalyst to us, fill out the form :

<https://kat-eko.com/pl/content/6-regeneracja-katalizatorow>

Also, do not forget to remove the cause of the faster wear of the cartridge, if the wear of the cartridge occurred faster than the standard the cause may be oil or fuel entering the exhaust system.
