## Product description:

### Regenerated catalytic converter TOYOTA Avensis II T25 2.0 2007

The subject of the offer is the regeneration of the catalytic converter consisting of welding new metal inserts into the original housing. The dimensions of the inserts: (100/100 mm.) have been optimally adapted to this particular car model in terms of diameter and length. It meets the EURO 4 emission standards. The applied sports catalytic converter inserts have a capacity of 200 cpsi. The vehicle can achieve better performance, more power and smoother acceleration. The sport catalytic converter cartridge is an ideal solution for customers looking for a balance between performance and compliance with emission standards.

### Model list:

Also don't forget to fix the cause of faster cartridge wear, if it has worn out faster than standard the cause may be oil or fuel entering the exhaust system. If you have a gas system installed and in addition it is not too well adjusted it also contributes to faster wear of the original ceramic cartridges, which are not resistant to the higher temperature of gas combustion.

**If you feel up to it, you can also replace the cartridge yourself, which you can buy at the link below:**
