

Regenerated Aston Martin DB9 6.0 V12 catalytic converter in ceramic coating

Product codes:

Reference: REG-ASTON001

EAN13: -

Product features:

Cartridge material: Metal - type S

Producer: OE

Engine capacity: 6.0

Year of production: 2004-2016

Horsepower: 450, 476 HP

OE number: 4G4E-5G232-BD, 4G4E-5G236-BE

Product type: Regenerated

Engine code: AM04 Warranty: 12 months

Product attributes:

Ceramic coating: Yes, Not

Product description:

WITHOUT DEPOSIT

Purchase with return of the old part – the item is shipped after we receive the old catalytic converter. The unit must be complete, original, marked with the OE number, and free from mechanical damage or signs of tampering. We do not accept cash-on-delivery (COD) shipments.

We offer a catalytic converter regeneration service, which involves replacing the inserts with new ones. The inserts used meet the relevant exhaust emission standards and effectively eliminate the low catalyst efficiency error. The metal core inserts used are much more durable than the original ceramic ones, and 400 cpsi perfectly reflects the original throughput, guaranteeing optimal engine power. The catalytic converter housings are coated with a special black ceramic layer that is resistant to high temperatures and minor mechanical damage. Thanks to the coating, the catalytic converter inserts heat up faster, reaching their operating temperature, i.e., the optimum temperature for exhaust gas catalysis, more quickly. At the same time, the ceramic coating effectively insulates the heat of the heated catalytic converters from nearby engine compartment components.
