Product description:**WITH THE RETURN OF THE OLD PART**

Purchase with the return of the old part - we ship the goods after the delivery of the old catalytic converter. The part must be complete, original, marked with the OE number and have no mechanical damage or signs of tampering.

If you are not sure if the catalytic converter fits your car, contact us via [contact form](#) and provide the VIN number, which will speed up an accurate verification.

Catalyst regeneration involves replacing the worn-out cartridge with a new metal one, restoring full efficiency of the system and meeting EURO 6 emission standards. The regeneration process uses high-quality metal cartridges with a capacity of 600 cpsi, corresponding to the parameters of the original. Thanks to the cartridges used, no errors appear in the engine controller. In rare cases, however, it may be necessary to manually clear the error using computer diagnostics, which is normal procedure after replacing exhaust system components.
